VANSH GUPTA

Frontend Developer | Software Development Engineer | React.js | Next.js | TypeScript
Bengaluru, India | +91 9953659805 | gupta20vansh@gmail.com | linkedin.com/in/vansh-gupta-aa1ba6212

PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of experience building responsive, user-friendly web interfaces and dashboards for platforms serving 10M+ users. Proficient in React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Context API, HTML5, CSS3, and REST API integration. Experienced in creating reusable UI components, implementing business workflows, handling authentication and client-side validation, rebuilding legacy React applications on Next.js, and building document verification workflows for lending operations. Delivers features in agile sprint cycles in close collaboration with backend, QA, and DevOps teams.

TECHNICAL SKILLS

Primary Technologies: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

State Management: Redux, Context API, Zustand, TanStack Query

API & Data: RESTful APIs, GraphQL, Axios, Fetch API, API Contract Definition

Build Tools: Vite, Webpack, npm, Git, GitHub

Frameworks & Libraries: Material UI, Bootstrap, Tailwind CSS, SCSS/SASS

Testing: Jest, React Testing Library

Tools & Platforms: VS Code, Figma, Node.js

Best Practices: Responsive Design, Accessibility (WCAG 2.1), Code Splitting, Lazy Loading, SSR/SSG, Legacy Code Migration, Dependency Upgrades, Agile/Scrum, Core Web Vitals, Cross-browser Compatibility

PROFESSIONAL EXPERIENCE

Software Development Engineer | Nextmantra **Mar 2026 - Present | Bengaluru, Karnataka**

- Revamping a Loan Against Property (LAP) operations dashboard from scratch, rebuilding a legacy Node 14 React.js app as a Node 20 + Next.js and TypeScript application with a new component architecture and state management.
- Building document management and verification workflows for the client's LAP team to review customer uploads and validate KYC and property details, including Aadhaar, PAN, property papers, and utility bills.
- Migrated 3 additional internal dashboards from Node 14 to Node 20, resolving deprecated packages and breaking changes with no disruption to production.
- Developed responsive and user-friendly web interfaces using React.js and TypeScript across 2 external and 6 internal projects simultaneously, implementing business workflows and shipping complete features end-to-end.
- Architected and built a Partner Commission Clawback Management Dashboard from scratch — a role-based internal tool with authentication, authorization, and client-side validation, enabling admin and finance teams to raise, process, and track clawback recoveries.
- Managed application state using Redux and Context API, integrating backend REST APIs with dynamic form configuration, presigned S3 document uploads, and server-side pagination and filtering.
- Collaborated with backend, QA, and DevOps teams across the full delivery lifecycle — from API contract definition to deployment support — using Git-based source control and agile workflows.
- Built a dynamic Udyam document verification flow with auto-fetch functionality via Decentro APIs, rendering multiple distinct UI states based on real-time API responses.

Associate Software Engineer | Ferns N Petals **Feb 2025 - Mar 2026 | Gurugram, Haryana**

- Engineered and maintained 25+ responsive, pixel-perfect React.js and Next.js UI components for a high-traffic e-commerce platform serving 10M+ users across India, implementing reusable component libraries and business workflows.
- Increased Jest unit test coverage from 45% to 87% (+42 percentage points), cutting production bug reports by ~30% and establishing a more reliable CI/CD pipeline.
- Optimized rendering performance and improved Core Web Vitals by applying route-based chunking, deferred module imports, and strategic asset management using Webpack, lifting Google Lighthouse scores on high-traffic product pages.

- Reviewed 50+ pull requests, enforcing WCAG 2.1 accessibility standards and cross-browser compatibility across Chrome, Firefox, Safari, and Edge.
- Integrated 10+ RESTful API and GraphQL endpoints using Axios and Fetch API, managing state with Redux across product listing and checkout flows.
- Delivered 8+ end-to-end features across agile sprint cycles in collaboration with design, backend, and QA teams, consistently meeting sprint deadlines.

Frontend Developer Intern | Ferns N Petals **Jul 2024 - Aug 2024 | Gurugram, Haryana**

- Built 10+ reusable React.js UI components using HTML5, CSS3, and JavaScript, shipped directly to the production codebase.
- Resolved 10-20 UI/UX bugs and implemented responsive design improvements using CSS Grid and Flexbox, reducing cross-device layout inconsistencies.
- Integrated RESTful APIs with Redux state management patterns, gaining production-grade experience with real-time data flows on a live platform.

KEY PROJECTS

Loan Against Property Dashboard Revamp - Nextmantra

- Rebuilt a legacy React.js dashboard from the ground up on Next.js, TypeScript, and Node 20, replacing outdated patterns with a modular, reusable component architecture and file-based routing.
- Built document review and verification flows for KYC (Aadhaar, PAN) and property documents, with UI states driven by verification status.
- Set up a repeatable Node 14 to Node 20 upgrade process, then applied it across 3 more internal dashboards.

Partner Commission Clawback Management System - Nextmantra

- Built end-to-end role-based dashboard using React.js and TypeScript — reusable component architecture, Redux state management, REST API integration, and client-side validation with server-enforced business rules.
- Defined complete API contract with backend team — available_actions pattern per record drives all UI interactions, eliminating hardcoded role and status logic entirely.
- Implemented presigned S3 document upload, dynamic form config API, server-side pagination and filtering, and invoice allocation module.

E-Commerce Gifting Platform - Ferns N Petals

- Architected 20+ modular, reusable React.js components integrated with REST APIs using Redux, powering product listing, search filters, and a 3-step checkout flow used by millions of users.
- Optimized rendering performance using Webpack — decreased initial JavaScript bundle size by 20% and improved First Contentful Paint by 0.8 seconds through code splitting and lazy loading.
- Wrote 80+ Jest and React Testing Library unit and integration tests, achieving 87% code coverage and reducing regression defects by ~30%.

EDUCATION

B.Tech in Computer Science | Graphic Era Deemed University | Oct 2021 - Aug 2025 | CGPA: 8.0/10

Class XII - Computer Science | Delhi Public School, Indirapuram | 2021 | CGPA: 9.2/10

LICENCES & CERTIFICATIONS

McKinsey Forward Program: McKinsey & Co. | 2026 (In Progress)

Meta via Coursera (2024): Introduction to Front-End Development · Programming with JavaScript · Basics of React · Basics of HTML and CSS · Version Control

ACHIEVEMENTS & EXTRACURRICULARS

- **Badminton Doubles Tournament - Men's U-19:** Competed in a district-level tournament, demonstrating teamwork and performance under pressure.
